SAP SUCCESSFACTORS HCM++

Nine Capabilities:
Product Mapping & Sample Reports

Which Cognadev products power each capability and what the output looks like

Anthyra AI | Absolute Systems (Cognadev) | March 2026 | Confidential

Overview

This document maps each of the nine HCM++ intelligence capabilities to the specific Cognadev products that power it, and provides a synthetic sample report showing exactly what output is returned for each capability. This is the “what” and “what it looks like” document — the SAP integration architecture (the “how it connects”) is covered in the companion document.

Capability → Product summary

Capability	Cognadev products	Pillar	What it delivers
Role Intelligence	CCM, Heatmaps	Design right	Precision role specification defining complexity level, pressure profile, decision rights, cognitive demands, and success conditions.
Fit Confidence	CPP, MP, VO, ICR, TIP 1	Fill right	Manipulation-resistant measurement of how a person actually thinks, decides, and operates under pressure.
Team Architecture	CCM, TIP 7, Heatmaps	Design right	Evidence-based team composition analysis showing coverage, complementarity, friction points, and impact of any hire or move.
Culture Visibility	VO, Heatmaps, Cliquidity	Fill right	Quantified mapping of values and behavioural orientation against target organisational culture at individual, team, and BU level.
Fragility & Risk Detection	MP, PRP, CPP	Fill right	Early warning system for performance breakdown under sustained pressure — derailers, defence mechanisms, resilience thresholds.
Performance Prediction	CPP, CCM, ICR, TIP 1	Develop right	Predictive performance modelling based on cognitive-role complexity match, execution style, and team dynamics.
Potential & Readiness	CPP, LOI, TIP 4, TIP 5	Develop right	Direct measurement of cognitive capacity for higher-level roles. Replaces subjective 9-box with quantified succession confidence.
Reward Intelligence	CCM, PRP, Heatmaps	Design right	Evidence-based reward architecture linking compensation to measured role dimensions with objective gates for conduct and risk.
Enterprise Intelligence	Heatmaps, TIP 6, TIP 7, Cliquidity, All	Develop right	Seven real-time organisational heatmaps — cognitive, culture, fragility, execution, leadership, role-fit, integrated — at all four levels.

1. Role Intelligence

Pillar: Design right | *Precision role specification defining complexity level, pressure profile, decision rights, cognitive demands, and success conditions.*

Cognadev products powering this capability

Code	Product	Role in this capability
CCM	**Contextualised Competency Mapping**	Primary. Defines cognitive complexity level (SST/VSM aligned), competency requirements, role interfaces, and operating context. Questionnaire completed by job experts with HR facilitator. ~2 hours.
Heatmaps	**Intellectual & Cultural Diversity Heatmaps**	Supporting. Visualises where the role sits in the organisational capability landscape — identifies crowding, vacuum, and diversity requirements.

Sample report output (synthetic data)

Role Intelligence Report — VP Operations, EMEA

Field	Value
Role ID	VP-OPS-EMEA-2026-001
Complexity Level	Level 4 — Multi-system (SST aligned)
Cognitive Demand	Systems thinking + execution discipline
Pressure Profile	High: pace (weekly cadence), ambiguity (cross-functional), scrutiny (board visibility)
Decision Scope	Cross-functional with P&L accountability, 12-month horizon
Key Interfaces	CEO, CFO, BU heads (5), External suppliers (3 strategic)
Critical Competencies	Operational governance (5/5), Stakeholder influence (4/5), Commercial judgement (4/5), Change leadership (3/5)
Culture Requirements	Innovation-tolerant, results-oriented, collaborative-hierarchical blend
Org Position	Vacancy in crowded execution band; requires differentiated strategic capacity
Role Clarity Index	92/100

2. Fit Confidence

Pillar: Fill right | *Manipulation-resistant measurement of how a person actually thinks, decides, and operates under pressure.*

Cognadev products powering this capability

Code	Product	Role in this capability
CPP	**Cognitive Process Profile**	Primary. Simulation exercise tracking thinking processes across thousands of measurement points. 2–3 hours, proctored, 11 languages. Measures 14 cognitive styles, learning agility, metacognition, suitable work complexity level.
MP	**Motivational Profile**	Primary. Gamified Jungian archetype assessment measuring drive, personality, EQ, defence mechanisms, integrity, performance risk. 30–40 min. Cannot be manipulated.
VO	**Value Orientations**	Primary. Non-transparent questionnaire measuring worldviews, decision-making frameworks, cultural memes. 30–40 min. 10 languages.
ICR	**Integrated Competency Report**	Synthesiser. Integrates CPP + VO + MP (plus third-party: Hogan, OPQ, MBTI, etc.) into unified competency view linked to role requirements.
TIP 1	**Talent Insights Profile — Individual Holistic**	Supporting. Full profile visualisation across all Cognadev dimensions. Auto-generated PDF.

Sample report output (synthetic data)

Fit Confidence Report — Sarah Chen → VP Operations EMEA

Field	Value
Candidate	Sarah Chen
Target Role	VP Operations EMEA (Level 4 — Multi-system)
Fit Confidence Score	91/100
Cognitive Complexity Match	Level 4.2 (role requires 4.0) — Strong match with headroom
Cognitive Style	Strategic-Analytical: strong systems thinking, integrative reasoning, moderate divergent capacity
Learning Agility	High (87th percentile) — rapid adaptation to novel complexity
Values Alignment	88% match to target culture — innovation-tolerant, results-oriented
Motivational Fit	High drive, resilience under scrutiny, constructive conflict style
Derailer Risks	Low: minor tendency to over-analyse under time pressure (manageable)
Integrity Indicators	Strong ethical orientation, consistent decision-making framework
Emotional Intelligence	Above average: self-aware, manages interpersonal dynamics effectively
Overall Recommendation	RECOMMEND — High confidence for sustained performance in role

3. Team Architecture

Pillar: Design right | *Evidence-based team composition analysis showing coverage, complementarity, friction points, and impact of any hire or move.*

Cognadev products powering this capability

Code	Product	Role in this capability
CCM	**Contextualised Competency Mapping (Team mode)**	Primary. Team-level job analysis comparing aggregate profiles against role requirements. Identifies coverage gaps and redundancies.
TIP 7	**Talent Insights Profile — Team Report**	Primary. Integrates all individual profiles into team-level analysis: complementarity, friction, cognitive diversity, values alignment.
Heatmaps	**Intellectual & Cultural Diversity Heatmaps**	Supporting. Visualises team capability distribution against requirements.

Sample report output (synthetic data)

Team Architecture Report — Operations Leadership Team (8 members)

Field	Value
Team	Operations Leadership
Members	8 (assessed)
Team Coverage Score	94% — Strong overall coverage
Cognitive Diversity	Good: 3 strategic-analytical, 2 operational-systematic, 2 integrative, 1 creative-divergent
Coverage Gap	Innovation capacity — only 1 member with strong divergent/creative cognitive style
Values Cohesion	82% — Strong on execution values; moderate tension on risk tolerance
Friction Points	Member 3 (high control) × Member 7 (high autonomy) — manageable with awareness
Complementarity Index	87/100 — Members cover each other's blind spots effectively
Fragility Assessment	Low — No single-point-of-failure; 3 members can step into adjacent roles
Impact of New Hire (Sarah Chen)	+12% coverage, +8% cognitive diversity, neutral friction
Recommendation	Well-composed for current mandate. Innovation capacity gap: address in next hire.

4. Culture Visibility

Pillar: Fill right | *Quantified mapping of values and behavioural orientation against target organisational culture at individual, team, and BU level.*

Cognadev products powering this capability

Code	Product	Role in this capability
VO	**Value Orientations**	Primary. Measures worldviews, cultural memes, perceptual frameworks. 10 languages.
Heatmaps	**Cultural Diversity Heatmaps**	Primary. Aggregates VO results across teams/BUs to create visual culture alignment maps.
Cliquidity	**Cliquidity Volume Assessment**	Supporting (scale). Rapid culture pulse across large populations using simplified VO-derived assessments.

Sample report output (synthetic data)

Culture Visibility Report — Sales EMEA (47 assessed)

Field	Value
Business Unit	Sales EMEA
Population Assessed	47 of 52 (90% coverage)
Target Culture Profile	Innovation-tolerant (35%), Results-oriented (30%), Collaborative (20%), Adaptive (15%)
Actual Culture Profile	Results-oriented (42%), Rule-compliant (28%), Competitive (18%), Collaborative (12%)
Culture Alignment	76% — Over-indexed on compliance and competition; under-indexed on innovation
Innovation Readiness	Low (23%) — Only 11 of 47 show innovation-tolerant values
Change Resistance Risk	High — 28% rule-compliant orientation = structural resistance to transformation
Subculture Tensions	Sales leadership (innovation) vs field teams (compliance) — execution friction likely
Recommended Interventions	1. Targeted hires into 3 team lead positions. 2. Values coaching for 8 high-potentials. 3. Redesign incentive structure.

5. Fragility & Risk Detection

Pillar: Fill right | *Early warning system for performance breakdown under sustained pressure — derailers, defence mechanisms, resilience thresholds.*

Cognadev products powering this capability

Code	Product	Role in this capability
MP	**Motivational Profile**	Primary. Measures defence mechanisms, energy themes, stress responses, performance risk, interpersonal functioning under pressure.
PRP	**Performance Risk Profile**	Primary. Derived from MP — detailed risk propensity analysis with role-specific suitability ratings.
CPP	**Cognitive Process Profile**	Supporting. Identifies cognitive overload indicators, emotional interference patterns, metacognitive blind spots.

Sample report output (synthetic data)

Fragility & Risk Report — Marcus Obi → VP Operations EMEA

Field	Value
Candidate	Marcus Obi
Target Role	VP Operations EMEA
Overall Risk Rating	MEDIUM — Manageable with targeted support
Resilience Under Pressure	Moderate — Sustained high-pace depletes energy after 4–6 months without recovery
Defence Mechanisms	Intellectualisation under stress (withdraws to analysis, delays decisions). Moderate conflict avoidance.
Energy Profile	High initial drive, declining under sustained ambiguity. Needs structured milestones.
Derailer Risks	1. Decision paralysis under time pressure (moderate). 2. Conflict avoidance leading to team friction (moderate).
Integrity Indicators	Strong — Consistent ethical framework, no concerns
Role-Specific Suitability	70% — High pace + ambiguity combination amplifies both derailer risks
Burn-out Risk	Moderate-High if placed without support structure
Mitigation Plan	1. Structured decision cadence. 2. Executive coach for conflict. 3. Quarterly resilience check-in. 4. Clear escalation framework.

6. Performance Prediction

Pillar: Develop right | *Predictive performance modelling based on cognitive-role complexity match, execution style, and team dynamics.*

Cognadev products powering this capability

Code	Product	Role in this capability
CPP	**Cognitive Process Profile**	Primary. Cognitive-role complexity match is the strongest predictor of sustained performance.
CCM	**Contextualised Competency Mapping**	Primary. Defines the complexity demands the CPP result is compared against.
ICR	**Integrated Competency Report**	Supporting. Synthesises CPP + other results into competency profile matched to role.
TIP 1	**Talent Insights Profile — Individual Holistic**	Supporting. Comprehensive prediction view.

Sample report output (synthetic data)

Performance Prediction Report — Sarah Chen, VP Ops EMEA (6-month forecast)

Field	Value
Employee	Sarah Chen
Current Role	VP Operations EMEA (started 2 months ago)
Delivery Confidence Score	89/100
Cognitive-Role Match	4.2 vs 4.0 required — Headroom (positive predictor)
Execution Style Match	92% — Strong alignment between delivery approach and role cadence
Predicted Trajectory	Stable-to-improving — Full effectiveness by month 4
Risk Factors	Minor: tendency to over-analyse may slow early decisions (self-correcting)
Team Impact	+12% team coverage maintained; no friction indicators
6-Month Forecast	GREEN — On track for above-target performance by Q3
Recommended Actions	1. Delegate strategic initiative. 2. 90-day coaching check-in. 3. Monitor decision speed in first board cycle.

7. Potential & Readiness

Pillar: Develop right | *Direct measurement of cognitive capacity for higher-level roles. Replaces subjective 9-box with quantified succession confidence.*

Cognadev products powering this capability

Code	Product	Role in this capability
CPP	**Cognitive Process Profile**	Primary. Directly measures cognitive complexity handling capacity for next-level roles (SST Level 3→4→5).
LOI	**Learning Orientation Index**	Primary (early career). Developmental CPP for ages 16–36. Cognitive potential and metacognitive leverage.
TIP 4	**Talent Insights Profile — Leadership Profile**	Supporting. Leadership readiness view with developmental guidelines.
TIP 5	**Talent Insights Profile — Early Career Profile**	Supporting (pipeline). Developmental pathways for emerging talent.

Sample report output (synthetic data)

Potential & Readiness Report — R. Patel → COO Succession

Field	Value
Candidate	Rajesh Patel
Current Role	SVP Manufacturing (Level 3.8)
Target Role	COO (Level 4.5)
Next-Level Readiness Score	78/100 — Ready with development in 12–18 months
Cognitive Capacity	Level 4.1 — Can operate at target level but at upper boundary
Growth Trajectory	Positive — Learning agility (82nd percentile) supports acceleration
Leadership Maturity	Strong operational; needs enterprise governance and external stakeholder management
Gap Analysis	1. Enterprise governance (critical). 2. External stakeholder navigation (important). 3. Strategic ambiguity tolerance (moderate).
Development Plan	1. Board committee observation (6mo). 2. Cross-functional project lead (12mo). 3. Executive coaching. 4. Quarterly re-assessment.
Succession Confidence	78% — Viable successor with structured 18-month path

8. Reward Intelligence

Pillar: Design right | *Evidence-based reward architecture linking compensation to measured role dimensions with objective gates for conduct and risk.*

Cognadev products powering this capability

Code	Product	Role in this capability
CCM	**Contextualised Competency Mapping**	Primary. Role complexity measurement for evidence-based job evaluation and grading.
PRP	**Performance Risk Profile**	Supporting. Conduct and risk evidence for reward gate/modifier decisions.
Heatmaps	**Intellectual Diversity Heatmaps**	Supporting. Identifies rare intellectual skill requirements warranting premium compensation.

Sample report output (synthetic data)

Reward Intelligence Report — VP Operations EMEA

Field	Value
Role	VP Operations EMEA
Complexity Score	Level 4.0 — Band: Senior Leadership
Reward-Capability Alignment	Currently 72% — Base appropriate; variable pay misaligned
Recommended STI	40% role outcomes, 25% execution quality, 20% domain judgement, 15% leadership
Recommended MTI	35% transformation milestones, 25% pipeline health, 20% execution quality, 20% adoption
Recommended LTI	65% sustainable value (ROIC/TSR), 25% portfolio economics, 10% enterprise capability
Conduct Gate	Applicable — PRP risk indicators as downward modifier (0 to -30%)
Rare Skill Premium	Not applicable (execution band well-populated)
Pay Equity Flag	None — Within tolerance for peer group

9. Enterprise Intelligence

Pillar: Develop right | *Seven real-time organisational heatmaps — cognitive, culture, fragility, execution, leadership, role-fit, integrated — at all four levels.*

Cognadev products powering this capability

Code	Product	Role in this capability
Heatmaps	**Intellectual & Cultural Diversity Heatmaps**	Primary. Aggregates all assessment data into organisational-level visualisations.
TIP 6	**Talent Insights Profile — Group Report**	Primary. Group-level reporting on any assessment dimension for any population.
TIP 7	**Talent Insights Profile — Team Report**	Supporting. Team-level analysis feeding BU and enterprise rollups.
Cliquidity	**Cliquidity Volume Assessment**	Supporting (scale). Mass-population assessment for enterprise-wide coverage.
All	**CPP, VO, MP, PRP, CCM, ICR**	Input data. All individual and role assessments feed the enterprise intelligence engine.

Sample report output (synthetic data)

Enterprise Intelligence Dashboard — Honda Motor Corporation Global

Field	Value
Organisation	Honda Motor Corporation Global
Population	800 of 800 senior leaders (100% coverage)
Overall Confidence Index	83% — Job-fit confidence across seven dimensions
Cognitive Heatmap	Strong: Operations (87), Product (92), Motorsport (94). Alert: Sales EMEA (71), HR (78)
Culture Alignment	81% enterprise avg. Gap: Motorsport (72% — innovation-strong but culture-misaligned)
Fragility Alerts	3 teams: Sales EMEA (42%), Motorsport (31%), Product (24%)
Execution Readiness	Strong: Operations (91), Finance (90). Gap: Sales EMEA (68)
Leadership Density	Adequate (avg 74). Vacuum: Sales EMEA (65), Motorsport (69)
Role-Fit Quality	87% enterprise avg. Critical: Sales EMEA (63% — 12 roles flagged)
Integrated Readiness	Operations 84%, Finance 87%, Product 81%, Motorsport 80%, HR 78%, Sales EMEA 64%
Priority Interventions	1. Sales EMEA restructure (immediate). 2. Motorsport culture programme. 3. Enterprise innovation gap closure.
